Projects

Online Voting System

- The Online Voting System is built using React.js for the frontend and Node.js for the backend and CSV file as database. React.js enables the development of a dynamic and responsive user interface, enhancing the user experience for both voters and administrators. It contains several modules on it.
- Built using Html, CSS, React.js

Garage-Management-System

- The Garage Management System is a valuable tool for automotive repair facilities, helping them deliver top-notch service, increase operational efficiency, and build lasting customer relationships. With its user-friendly interface and powerful features, GMS empowers garages to thrive in a competitive market while ensuring a seamless and satisfying experience for both customers and staff.
- Built using Salesforce

Additional Certificates

- Java - Full Stack Development Course by Career Lader
- IR4.0 Foundation Course Sponsored by Microsoft and SAP
- Front - End Development course by Meta
- Hands - on Training in IOT (Workshop)
